SUMMARY

Full Stack Developer with hands-on experience building MERN stack applications used by **5,000+ real users**. Skilled in React.js, Node.js, Express.js, MongoDB, and TypeScript, with a solid understanding of RESTful APIs, authentication (JWT, RBAC), and cloud deployment (AWS, Vercel). I enjoy turning ideas into clean, working products and am looking for an entry-level **SDE** role full-time or internship where I can contribute and grow.

SKILLS

Languages	JavaScript, TypeScript, Python, C, SQL
Frontend	React.js, HTML, CSS, Tailwind CSS, React Router, Context API
Backend	Node.js, Express.js, RESTful APIs, Microservices, JWT, bcrypt.js, WebSockets
Databases	MongoDB, MySQL, Mongoose
Cloud & DevOps	AWS (EC2, S3), Docker, GitHub, Postman, npm, VS Code, vercel
AI & Tools	Claude, OpenAI, Prompt Engineering, Chatgpt, Antigravity, Cursor
Concepts	System Design, MVC Architecture, SDLC, OOP, DSA

EDUCATION

B.Tech in Computer Science and Engineering — **KIIT University, Bhubaneswar, Odisha**
Kalinga Institute of Industrial Technology (KIIT)

2022 – 2026
GPA: 8.84 / 10.0

EXPERIENCE

Full Stack (MERN) Developer Intern | AICTE – EduSkills

Dec 2025 – Jun 2026

- Developed a Customer Engagement Task Tracking application using **Node.js** and **MongoDB** to manage and monitor customer engagement activities efficiently.
- Implemented secure Login and Signup functionality using **JWT**-based Access Tokens and Refresh Tokens for authentication and authorization.
- Designed and integrated **MongoDB** database storage for managing customer engagement tasks and related user data.
- Created an interactive dashboard to display, track, and update customer engagement tasks in real time.
- Implemented a secure Logout feature using **JWT** token handling and **cookie-based** session management to enhance application security.

PROJECTS

TaskFlow — **Full-Stack Project Management Platform** — <https://taskflow-inky-theta.vercel.app>

Oct – Dec 2025

- Built a Kanban project management Web app using the MERN stack with drag-and-drop tasks, team collaboration, and a clean responsive UI.
- Added secure login and signup using **JWT** authentication, role-based access control, and password hashing to protect user data.
- Developed key features including an analytics dashboard, calendar view, real-time notifications, and CSV export for better team productivity.
- Improved app performance with lazy loading and deployed on **Vercel** with fast response times.
- Optimized backend performance using **MongoDB indexing** and query optimization, reducing API response time for large datasets.

KIITGO — **Smart Bus Service Management System** — <https://kiit-go-transport-system.vercel.app>

Jun – Oct 2025

- Built a full-stack bus transportation platform using the MERN stack that serves **5,000+ students and faculty**, solving daily commute tracking problems.
- Designed a scalable backend with MVC architecture, Mongoose, and database indexing; delivered RESTful APIs with **sub-100ms** response times under concurrent load.
- Built **3 role-based portals** (Student, Driver, Admin) with protected routing, JWT authentication, RBAC, and HTTP-only cookies, reducing unauthorized access to zero.
- Automated email notifications via Nodemailer and bulk timetable imports using ExcelJS, saving **5+ hours/week** of manual admin work.
- Deployed on Vercel with MongoDB, connection pooling, and indexed queries for high availability; followed Agile/Scrum practices across the full development lifecycle.

CERTIFICATIONS

DevOps & Cloud Automation | AICTE – EduSkills

Jun 2026

CI/CD pipelines, Docker containerization, **cloud deployment workflows**, and infrastructure automation using shell scripting.

Full-Stack (MERN) Software Developer | AICTE – EduSkills

Mar 2025

Built end-to-end web apps using React.js, Node.js, Express.js, MongoDB; implemented REST APIs, JWT authentication, and deployed scalable full-stack applications on cloud platforms.

ACHIEVEMENTS

- Engineered and deployed **2 production-grade full-stack applications** serving **5,000+ real users**; independently managed complete **SDLC** from system design to deployment, including cloud infrastructure setup.
- Achieved **8.84 GPA** at **KIIT University** while concurrently building and shipping production-grade, industry-level projects.
- Actively solving **DSA** problems on **LeetCode**; strong foundation in arrays, hash maps, trees, graphs, dynamic programming, and recursion.
